Conwell Russell Conwell (1843 - 1925) Text of famous inspirational lecture and biography of Russell Conwell, a Baptist minister and Temple University Founder (Summary by Scott Dahlem) Genre(s): Self-Help, Christianity - Commentary, Christianity - Biographies Language: English TWITTER @DEANBOKHARIà Â| INBOX INSPIRATIONà Listen elsewhere: Apple Podcasts | Spotify | Overcast | Google Podcasts | MP3 There¢ÃÂÂs an old story called ¢ÃÂÂAcres of Diamonds¢Â that originates back to 1869, when a man named Russel Conwell heard it from an Arab guide while traveling along the Euphrates River in the Middle East. He reached into the water and picked up a stone. If not, what can I begin doing to start today? There are better ways to do what I do. And when we practice intelligent risk-taking, it can bring out the best in us. Then, he took the stone home and placed it on the mantel over his fireplace as a decoration of sorts. Several weeks later a friend of his came by to visit. Kindle ¢Ã ¢ÃÂPaperback \$2.50 \$1.16 Project Gutenberg 68,258 free ebooks 12 by Russell H. He looked at the farmer's friend and said: "No, I found it for a while and I thought it was just a beautiful Piece of crystal. The visitor paused and said: "You just found one of the biggest diamonds ever discovered." The farmer had trouble believing that. He told his friend that his creek was full of stones like this, not as large as that of the Mantel, but the stones were generously scattered throughout the creek's bottom here at his property. The farmer had sold, so that he can find a diamond mine, ended up being one of the most productive diamond mines on the entire African continent. The first farmer had - free and clear - acres of diamonds. But he sold them for virtually nothing in order to look for them elsewhere. Did he notice how what he's doing can be capitalized or multiplied? If you are happy with things as they are, then by all means keep them that way. When he died in 1925, he made his diamond speech acre more than 6,000 times. The story is about an African farmer who heard about other farmer so excited that he could hardly wait to sell his own farm and go prospecting for his own diamond. The mines ... well, he spent the rest of his life wandering the African continent in search of these diamond mines - unsuccessfully. It seems that this farmer did not have the same luck as the others he heard of; And, eventually, tired and depressed, the farmer did not have the same luck as the others he heard of these diamond mines - unsuccessfully. It seems that this farmer did not have the same luck as the others he heard of these diamond mines - unsuccessfully. It seems that this farmer did not have the same luck as the others he heard of these diamond mines - unsuccessfully. It seems that this farmer did not have the same luck as the others he heard of the second dig the attention - was coming from the bottom of the stream ... then he leaned to see what it was. How to mention your own acres of diamonds. If we had only the wisdom and patience to intelligently, effectively and thoroughly explore the workline we are currently engaged in - to explore ourselves more fully - we have much more probability of finding health, wealth And happiness that many of us, all over the world, are looking for. Before you run for what you think are greener pastures, make sure yours is not so green or maybe even greener. When we do this, we will eventually discover our own diamond mines. We remain and reaffirm your goal, the only thing you want to do most, the place of life you want to achieve most. It was a very big, bright and beautiful stone. We never get bored or find ourselves in a routine. They can force us to think creatively and create new ideas. Risks are scary. If millions or billions of people are doing this way, or thinking about this way, it is not the best way ... It's the middle way. The people who are going the best way is away. They are so in front of the crowd that you can no longer see their dust. These are the people who live and work at the forefront, the forefront, the forefront, and mark the way for everything else. Intuitive intelligence and imagination to know that in its rough state, diamonds do not look like the polished stones you see behind the glass in a jewelry store. Out and watch your own work as someone from another planet, you can look at it. In the structure of which industry or profession your work falls? What are they? How will my work be done in 5, 10, 15 and 20 years? The new and exciting opportunities are waiting for you ... and often you don't need to look at thanà Âwithinà Âto find them.It¢ÃÂÂs also helpful to ask yourself¢ÃÂÂand write down your answers to¢ÃÂÂthe following key questions: How can I serve and clients; to my family and friends?I¢ÃÂÂm surrounded by hidden diamonds right where I stand¢ÃÂhave I been looking for them?Have I examined every element of my work and my industry?How good am I at what I¢ÃÂm presently doing?Can I call myself a first-class professional at my work?Am I regularly expanding my knowledge about my industry? One bright morning you¢ÃÂll find yourself passing the harbor light. The story inspired Conwell so much, that he began sharing it with others, who were also inspired. Everything changes and evolves. Sometimes for better; sometimes for worse. And it¢ÃÂAs risk involved; incredible things rarely happen without risk. We begin running risks from the moment we wake up in the morning. Will it even exist?Could there be some sort of opportunity ahead, somewhere in the near-future, that others don¢AÂAt it time for a refreshing change of some kind? The only thing you can be sure of about the world is change. And one of the best ways to accomplish that is to choose a purposeful path, and to stay the course. course.

They had picked up the idea of "prisons" from episodes in the Life of Odo, which all of them who had elected to work on History were reading. There were many obscurities in the book, and Wide Plains had nobody who knew enough history to explain them; but by the time they got to Odo's years in the Fort in Drio, the concept "prison" had become self-explanatory.
