Desynthesis ActionPatch 2.3 Cast: Instant Recast: Instant Everyrry The disciple of the hand class has a maximum level of qualification of 580 desints, which is leveled individually by the other classes. Rebuild Lists Quest Level Gone To Pieces 30 Overview des Sintesi is an skill, obtained by completing the level 30 of research Gone to Pieces, which allows you to break down the elements in the elements from which they are made. Typically the objects will break in materials from craftsmanship, demonstheres and crystals. Some objects can also produce Gil pieces, weapons, armor, housing, or other types of objects. Desynth can cause both hq and types of articles. Almost all weapons, tools, reinforcement, accessories and housing material and furnishings (if they are made, purchased, marketed or obtained by Dungeons), can be dessical. Everyone but some fish are also disappointing. Key or special products of these types cannot be dessintensi, including weapons or objects that can be reduced to aethersand instead. Basic level crafts materials cannot be dessinth. The potions and meals are not generally disappointing, even if there are some exceptions. Players can access the skill of the Destese via the contextual menu of an element in the inventory or via the Summary Des menu. For the elements that stack in the inventory, the Desynth option all the elements in the stack is available (from patch 5.3). The classes and levels of Desynth's skill each definable element is aligned with a class of craftsmanship and each class of craftsmanship has a level of qualification of desints that starts at 1 and can reach a maximum of 580 (as of patch 6.0). Players can only object objects if they have unlocked the craft class of the object, even if the players don't have to use that class while trying to The objects that can be Desynthed have their optimal level of desints and the craft class listed on the product. For artisan articles, this level of desints is based on the level of the recipe, while for the booty of dungeon, fish, etc., it is based on the element on the element .epicer eht ni detstil seititnaug eht ni ,meht ekam ot dedeen slairetam gnitfarc dna slatsyrc eht ecudorp ot elbissop syawla si ti ,detfarc eb nac taht smeti elbahtnyseed roF ,rotareneg rebmun modnar a morf ecnahc yb denimreted si dna egnar taht nihtiw seirav tpmetta htynsed hcae Morf ytitnaug deppointd eht .Epher eht no de , Meti ,reve rof stuoma dextrif era pord Hcae Fo fo ytitnaug mumixam dna miminim .99 ot 1 morf ehca yp ygnar yi yi meti yi yam LATSYRC 2 FO MIMIXAM that ,tpmet htynsed Elgnis ni .Slatsyrc Fo Sepyt 2 DNA ,Airetamimed Fo sepyt 2 ,smeti lairetam gnitfarc FO sepyt tne spy seped seped simxam sed sedt seped sed shy also hcae rof dexif era meti na gnihntynsed nehv deniatbo spord htynsed .Dedrawer ecneirepxe orez Nehh ,ssalc gnitfarc-non that Reyalp htynsed htynsed htynsed htynsed t delippa si ecneirepxe eht taht etoN .keew taht smeti evif dehtnyseed sah reyalp eht nehv level s'ssalc gnitfarc tneruc rieht fo %01 ot Inelaviuge ecneirepxe dna lig 0002 reyalp eht gnivig kaerB giB yM htiv ,elbalava si htynsed rof noitca gol .egnellahc ykceew elbatapeer A GOL Egnelaha .Smeti Reraz/Eulav Rehghil Dna Airetamimed Ecudorp htynsed eht taht Ecnahc Desarctni na ereht niag levels lliks tsoob ot desu Eb nac smeti owt .JIO Eht FO Level Siisehtnyseed eht rof roen rof rehghil the level s'me eht fi ,meti na slhtynsed Reyalp nehv .Level sisehtnyyed reponp eht tsil silw met will always drop at least one of each kind of crystal featured in the recipe. If an item's recipe contains more than 4 crafting materials (e.g. Cobalt-barreled Carbine) then only the first 4 listed crafting materials can be dropped. All (non-fish) desynthables can produce demimateria, which ranges from levels I to III, with cheaper items producing lower levels. Equippable items can produce Battlecraft Demimateria, non-equippable items can produce Fieldcraft Demimateria, and both can produce Clear Demimateria which sells for Gil. Items which feature demimateria in their crafting recipe can also separately drop that kind of demimateria as part of the crafting material drops. Desynthable items which cannot be crafted, such as dungeon loot, will drop a maximum of 2 types of crafting materials, 2 types of demimateria, and 1 type of crystal. The maximum number of crystals which can be obtained via desynth from each dungeon item is the same across all items in the dungeon, with aetherial equippable items being an exception. When desynthed, most seafood items typically produce Water Crystals and either Fine Sand or Gil pieces. Rarer types of fish may produce other types of drops, such as catalyts or rare items (e.g. Shark Tuna may produce Summer Sandals). Some items are only obtainable via desynth. Usually these items (such as Aged Pestle Pieces or Dancing Wing) are linked to quest turn-ins, Relic Weapons or are materials needed for rare craftable items. Strategy The Desynthesis skill can be used by players as a method of saving currency and/or time, by turning unwanted items into materials they need for crafting . It can also be used as part of a gil-making strategy, by desynthing unwanted items and selling the dropped items on the marketboard or to NPC vendors. The latter strategy works best where the value of the desynthed item (on the marketboard or in Grand Company Expert Delivery) is lower than the value of the items snoitacoL spaM topS gnihSiF 41 ysatnaF lanIF ytilaergnimaG snoitacoL spaM topS gnihSiF 41 ysatnaF lanIF ytilaergnimaG snoitacoL spaM topS gnihSiF 41 ysatnaF lanIF .nottub daolnwod gnisu segami eht daolnwod ot elba eb lliv uoy ,diordnA ro sOI ,cam ,swodniW s'ti rehtehW .ressorb morf Reward unem dluc uoy ,enohp elibom gnisu era uoy fi picp,JCP LRTO GNU'SU' GNHSHF 41 ysatnaF lanif kraamkoob ot rof .
